

# Are you an individual living with lupus?

## Join Our Study: Risk of Infection in Systemic Lupus Erythematosus (SLE) in Kenya

Your participation could make a difference in the lives of many lupus patients.

### Who Can Participate?

- Individuals above the age of 18 years diagnosed with Systemic Lupus Erythematosus (SLE)
- Residents of Kenya

### Why Participate?

- Contribute to research that could improve treatment and care for people living with lupus in Kenya
- Help us find out what increases the risk of infections in people with lupus and create ways to prevent them.
- Your participation could lead to new discoveries and better health outcomes for people with lupus.

### Study Details

- Location: Nairobi, Kisumu, Mombasa
- Duration: 2 years (September 2024 – September 2026)
- Participants will receive reimbursement for their time and travel expenses.

### Your Health Matters

Together, we can make a difference. Join us in this research and help improve the future for people living with lupus in Kenya.
